

# STRATEGIC CYBERSECURITY ADVISORY SERVICES FOR THE FEDERAL GOVT.

## The Challenge:

Technology alone can't solve complex IT modernization challenges. Federal leaders need a clear strategic plan to ensure investments in platforms like Zscaler deliver on mission resilience and meet key mandates.

## The Solution:

ROAM FEDERAL provides the strategic guidance needed to navigate this landscape. Our services, available now on NASA SEWP, ensure your Zscaler deployment and cybersecurity strategy are fully integrated into your agency's unique governance and mission objectives.

## Our Custom SKUs:

**ROAM-FED-ADV-SVC:** Executive advisory to develop and execute a proactive cybersecurity strategy. We provide expert guidance on building a Zero Trust roadmap and managing cyber risk to enhance your agency's security.

**ROAM-FED-SAC-SVC:** Provides access to our team of former senior federal leaders who offer executive-level, mission-focused cybersecurity guidance. This service ensures major security deployments align with your mission and adhere to evolving cyber policy.

## The Advantage:

Our veteran-owned firm offers mission-oriented expertise and unparalleled leadership, with services designed for flexible and simplified procurement. Our guidance is rooted in decades of real-world government experience, ensuring our recommendations are both effective and practical for federal agencies.

## Ready to Accelerate Your Mission?

Talk to a Zscaler or Carahsoft representative to begin discussions and get ready to add our strategic advisory SKUs to your next technology purchase.
